

# Systemd in the Initramfs

Harald Hoyer

Red Hat

One Init for both worlds

Advantage of all system features

# Generators

cryptoluks

Journal

`/run/systemd/system/`

`ConditionPathExists=/etc/initrd-release`

# Targets:

emergency.target

sockets.target

sysinit.target

basic.target

initrd-switch-root.target

dracut-cmdline.service  
dracut-pre-udev.service  
dracut-pre-trigger.service  
dracut-initqueue.service  
dracut-pre-pivot.service  
udevadm-cleanup-db.service  
initrd-switch-root.service

emergency.service  
rescue.service

# Systemd Serialization

Future:

replace network with systemd native network  
infrastructure

Thanks!
